## 1 INTRODUCTION

This document describes the usage, functionality, and message codes of the IBISCHK6 Version 6.0.x source code and its associated executable programs. IBISCHK6 is used to test files for conformance with IBIS (I/O Buffer Information Specification) Version 6.0.

- The IBIS Version 6.0 Specification is available at [www.eda.org/ibis/ver6.0](http://www.eda.org/ibis/ver6.0).
- IBISCHK6 executable program is freely available at [www.eda.org/ibis/ibischk6](http://www.eda.org/ibis/ibischk6).
- Checks performed by IBISCHK6 are documented here.
- A high-level description of the source code package is provided, but actual documentation and utilities exist in the source code package. The license to be filled out is located with the executables, and the source code package is available from the IBIS Open Forum.

IBIS Version 6.0 describes formats named IBS, PKG (Define Package Model), EBD (Electrical Board Description), and AMI (Algorithmic Model Interface). IBISCHK6 parses files with .ibs, .pkg, .ebd, and .ami extensions. The first three file formats are keyword based with keywords enclosed by square brackets. The .ami format is tree-structure based where a parameter hierarchy is documented with parentheses.

Note that this specification was first written for IBISCHK6 Version 6.0.0. Prior versions of this document do not exist. As the IBIS specification evolves, the IBISCHK executable program and this IBISCHK specification will evolve and be numbered in parallel with IBISCHK version numbers.

The source code consists of C language modules (.c and .h files) and makefile scripts to create the executable code for the operating system being used. Windows and Linux makefiles are supplied along with compiled executables.

In addition, multiple suites of QA (quality assurance) tests are provided for major and minor version levels starting with IBISCHK3. The test cases consist of IBIS files, their outputs, also their golden results. These test cases often relate to the feature set evolution (through the BIRD buffer issue resolution document revision process) and through code corrections (documented with BUG reports). The links below are:

- BIRDS: [www.eda.org/ibis/birds](http://www.eda.org/ibis/birds)
- BUGs: [www.eda.org/ibis/ibis-bugs](http://www.eda.org/ibis/ibis-bugs)

## 2 IBISCHK6 USAGE

When “ibischk6” is run with no arguments, IBISCHK6 prints this help message:

IBISfile validation:

This program has been provided free to the electrical engineering community by the IBIS Open Forum. The purpose of this program is to validate that the contents of ASCII device data in a file specified conform to the IBIS specification.

```
Usage: IBISCHK6      <IBS filename>
       : IBISCHK6  -ebd <EBD filename>
       : IBISCHK6  -pkg <PKG filename>
       : IBISCHK6  -ami <AMI filename>

Usage: IBISCHK6  -caution -numbered      <IBS filename>
       : IBISCHK6  -caution -numbered -ebd <EBD filename>
       : IBISCHK6  -caution -numbered -pkg <PKG filename>
       : IBISCHK6  -caution -numbered -ami <AMI filename>
```

The flags prior to the file name can be in any order, and the -caution and/or -numbered flags are optional.

One (and only one) file name argument must be provided to perform checking, and the file name extension must be consistent with the file type flag.

### 2.1 INPUT FILE FLAGS

The following option flags are required for files other than those in the **.ibs** format.

- pkg**            Use this option if the file is in Define Package Model format, described in section 7 of the IBIS 6.0 Specification.
- ebd**            Use this option if the file is in Electrical Board Description format, described in section 8 of the IBIS 6.0 Specification.
- ami**            Use this option if the file is in Algorithmic Model Interface format, described in section 10.3 of the IBIS 6.0 Specification.

Note: if a top-level file calls other IBIS (IBS, PKG, EBD, and AMI) files, then all referenced files are checked with one call. For example, an EBD file can contain other EBD references and also IBS file references that reference both PKG files and also AMI files. The top-level EBD file check will initiate checking for that EBD file plus checking for all referenced files. These referenced files could also be checked individually by using the appropriate input file flags.

## 2.2 OUTPUT FLAGS

Printed output messages can be modified using the following flags:

- caution** Additional Cautions level messages will be printed only when the -caution flag is used. Their meaning is described further below and in section 3.
  
- numbered** The -numbered flag gives alphanumeric message codes rather than generic codes. The generic codes messages begin with ERROR, WARNING, NOTE, INTERNAL ERROR, or CAUTION (when using the -caution flag). With the -numbered flag, the message format is <single-letter-category><four-digit-number>, discussed later. For example, one generic message begins with WARNING (without the -numbered flag) or W1113 (with the -numbered flag).

### 3 OUTPUT MESSAGE CATEGORIES

Message categories with their single-letter-categories in parentheses are described below by descending severity. ERROR messages and some INTERNAL ERROR messages indicate a model file that should not be used. Most EDA tools will reject models that produce these messages. Models with WARNING, CAUTION, and NOTE messages should be reviewed manually or graphically to understand if the noted issues are important.

As IBISCHK has evolved, some messages have been promoted to a stronger level and some have been demoted. While the category code has changed, the message number remains the same. The Messages with their single-letter-category in parentheses are described below:

#### **(E) ERROR MESSAGES**

Error messages are issued if there is a documented specification violation based on a syntax rule, a syntax argument violation, or some required combination of keywords, or subparameters and arguments. In some cases an unstated major violation (such as I-V to V-T table mismatch beyond 10%) is deemed an Error, because better matching is expected by proper extraction rules based on IBIS Version 6.0 Section 9 “Notes on Data Derivation Method”.

#### **(B) INTERNAL ERROR (BUG) MESSAGES**

Internal Error messages flag system errors that are not necessarily related to the model data (for example, memory allocation errors), and functional errors that are expected to be rare but are not easily documented by any means other than giving code file name and line number. In some cases the Internal Error messages reveal IBISCHK6 program bugs where the message should have been documented as an Error. We request that suspected program bugs be reported to [ibis-bug@eda.org](mailto:ibis-bug@eda.org).

#### **(W) WARNING MESSAGES**

Warning messages are issued based on expected common practice and expected range of data values. They alert the user that something is likely to be wrong with the IBIS file. Usually no rule stated for these Warnings in the IBIS specification, but the model may contain suspicious data or may have missing subparameters that make it unusable for high-speed signal integrity application in common EDA tools. For example, limits on C\_comp values are checked to warn the model developer about excessively high values (such that might have occurred if the modeler incorrectly entered 1F instead of 1nF).

#### **(C) CAUTION MESSAGES**

Caution messages require the `-caution` flag and are issued where even a Warning message can be incorrect for some cases or where a problem has no impact on simulation and a Warning message would cause many Warnings to appear in older models. For example, the [Ramp] dV values can now be checked for validity, but a flawed dV entry should have no impact on simulation. Older models developed without a dV check (prior to IBISCHK5) could exhibit many failures. Also, in some rare I/O models, Vmeas can fall outside of the Vinh and Vinl. For this case, a Caution message is issued to alert the modeler of a possible data entry mistake.

#### **(N) NOTE MESSAGES**

Note messages are also cautionary, but no option flag is required to produce them. So far, Note messages are used only for cases where I-V data contains non-monotonic data points. Monotonic data for I-V tables is not required in the IBIS Specification. However, it is very useful to know if any of the I-V data is non-monotonic, or if combined I-V tables (where all clamp tables are included) are monotonic. Combined tables with non-monotonic points might cause simulation

problems in some EDA tools. Sometimes there is no impact, especially if some of the detected non-monotonic points are very small (numerical noise) and in regions that are outside the normal simulation region. Inspecting or graphically viewing the tables is advised. In earlier versions of IBISCHK, the non-monotonic I-V reports were issued as Warnings. This was objectionable because some model vendors and users require having zero Errors and Warnings.

### **UNUSED MESSAGES**

Unused messages are old messages that still exist in “dead” code and should never be encountered due to subsequent code changes. The messages are retained for historical source code documentation and also for the cases where they might show up when using earlier versions of IBISCHK.

## 4 MESSAGE LISTING BY CODES

Message Codes along with their Symbols and Messages issued by IBISCHK6 are shown in the next sub-sections below. Each message has a shaded and unshaded row and the following columns:

1. **Code** – In the shaded row the alphanumeric Code consisting of a <single-letter-category><four-digit-number> (for example “E0102”) is given. Alphanumeric Codes are issued by IBISCHK6 when the **–numbered** option is used and the documented problem is encountered.
2. **Symbol** – In the shaded row the message symbol found in the IBISCHK6 source code is given. The Symbol name identifies the source code module in which the message is encoded. For example, MDL\_ERR\_0 can be located in mdl.c. Each distinct Symbol name within a module has a distinct trailing integer (for example MDL\_ERR\_1, MDL\_ERR\_2, etc.). The symbol always has ERR regardless of its actual category.
3. **Message/Comments** – The shaded row shows the printed message with variable portions denoted by labels (where actual names or numerical information is substituted) enclosed in {curly brackets}. The unshaded row of each message contains a comment with further details or clarifications. Some comments still need to be refined and others still need to be filled in. If the message is not used in IBISCHK6, “Unused” is shown in the Comment field.

The Message Codes are organized and indexed in groups of 500 for easier location. Usually a contiguous set of Codes will correspond to a contiguous set of Symbols. Numerical gaps exist in the message Codes to allow room for new messages. So while the actual Code numbers range from 0100 through 5204, this document contains only 1258 messages codes.

An example of a message without and with the **–numbered** flag, respectively, is shown below:

```
WARNING - Model BUFFER: GND Clamp : Typical value never becomes zero
W1113 - Model BUFFER: GND Clamp : Typical value never becomes zero
```

The table entry located by its four-digit-number is:

<b>W1113</b>	CRV_ERR_13	{label} {name}: {curveName} : Typical value never becomes zero
--------------	------------	--

*A general message indicating that the section with name has a curve whose typical current never becomes zero*

This message exists in crv.c. The {label} is “Model”, the {name} is “BUFFER”, the {curveName} is “Gnd Clamp”, and the message is printed as shown above. An expanded comment is given in the unshaded row.

The message listing follows in the sections below.

### 4.1 MESSAGE CODES 0 TO 499

Code	Symbol	Message/Comments
<b>B0100</b>	MDL_ERR_0	Unable to Allocate Memory: {sourceFile} {sourceLinenum}

[UNUSED]

<b>B0101</b>	MDL_ERR_1	Unable to get IBIS structure {sourceFile} {sourceLinenum}
		<i>Program data structures are corrupt</i>
<b>E0102</b>	MDL_ERR_2	( line {lineNum} ) - Orphan Model keyword.
		<i>Model keyword found but not within a Model declaration</i>
<b>E0103</b>	MDL_ERR_3	( line {lineNum} ) - Illegal Digital Port (not allowed in SPICE/IBIS-ISS Ports section)
		<i>Improper use of Digital port</i>
<b>E0104</b>	MDL_ERR_4	( line {lineNum} ) - D_switch not allowed with (D_drive~D_receive~or D_enable) in Ports/A2D/D2A Section
		<i>Improper use of D_switch</i>
<b>E0105</b>	MDL_ERR_5	( line {lineNum} ) - {portName} not allowed with D_switch in Ports/A2D/D2A Section
		<i>(D_receive; D_enable; D_drive) are not allowed with D_switch</i>
<b>E0106</b>	MDL_ERR_6	( line {lineNum} ) - Reserved Digital Port used as analog port
		<i>Improper use of Reserved Digital port</i>
<b>E0107</b>	MDL_ERR_7	( line {lineNum} ) - Orphan data line keyword.
		<i>A Model related data line was found where none was expected</i>
<b>E0108</b>	MDL_ERR_8	( line {lineNum} ) - TTgndTypical value should be > 0
		<i>Improper TTgnd typical value</i>
<b>E0109</b>	MDL_ERR_9	( line {lineNum} ) - TTgndMin value should be > 0
		<i>Improper TTgnd minimum value</i>
<b>E0110</b>	MDL_ERR_10	( line {lineNum} ) - TTgndMax value should be > 0
		<i>Improper TTgnd maximum value</i>
<b>W0111</b>	MDL_ERR_11	TTgnd typ value is not in between Min and Max
		<i>Improper range for TTgnd</i>

<b>E0112</b>	MDL_ERR_12	( line {lineNum} ) - TTpower Typical value should be > 0  <i>Improper TTpower typical value</i>
<b>E0113</b>	MDL_ERR_13	( line {lineNum} ) - TTpower Min value should be > 0  <i>Improper TTpower minimum value</i>
<b>E0114</b>	MDL_ERR_14	( line {lineNum} ) - TTpower Max value should be > 0  <i>Improper TTpower maximum value</i>
<b>W0115</b>	MDL_ERR_15	TTpower typ value is not in between Min and Max  <i>Improper range for TTpower</i>
<b>E0116</b>	MDL_ERR_16	( line {lineNum} ) - [Model Spec] should be specified immediately after all the subparameters of a model and before the other keywords of a model  <i>Improper positioning of [Model Spec]</i>
<b>W0117</b>	MDL_ERR_17	( line {lineNum} ) - [Receiver Thresholds] should not be specified for model type {modelType}  <i>Receiver thresholds are not allowed for a which is not an Input or I/O model type</i>
<b>E0118</b>	MDL_ERR_18	( line {lineNum} ) - [Add Submodel] should be specified before other keywords for a model  <i>[UNUSED]</i>
<b>E0119</b>	MDL_ERR_19	( line {lineNum} ) - {subparam/keyword} Already Defined For Model '{modelName}'  <i>A model was already defined for</i>
<b>E0120</b>	MDL_ERR_20	( line {lineNum} ) - [Receiver Thresholds] should be specified immediately after all the subparameters of a model and before the other keywords of a model except [Model Spec]  <i>Improper positioning of [Receiver Thresholds] keyword</i>
<b>E0121</b>	MDL_ERR_21	( line {lineNum} ) - Expecting Keyword. Invalid Line  <i>An invalid line was found where a keyword was expected</i>
<b>B0122</b>	MDL_ERR_22	Should Not Be Here: {sourceFile}~ {sourceLinenum}  <i>The code has a bug</i>

<b>E0123</b>	MDL_ERR_23	( line {lineNum} ) - Expecting [End External Model]. Invalid Line~FATAL ERROR  <i>Some data other than [End External Model] found</i>
<b>E0124</b>	MDL_ERR_24	( line {lineNum} ) - Expecting [End External Model]. Invalid Line  <i>[UNUSED]</i>
<b>B0125</b>	MDL_ERR_25	( line {lineNum} ) - Unable to eat keyword: {sourceFile} {sourceLinenum}  <i>Error in parsing keyword</i>
<b>E0126</b>	MDL_ERR_26	Unable to Save Model Name  <i>[UNUSED]</i>
<b>E0127</b>	MDL_ERR_27	'Model' Keyword Missing name  <i>The name of the model was not specified with the [Mode] keyword</i>
<b>E0128</b>	MDL_ERR_28	( line {lineNum} ) - Incorrect Number of Line Items ( {numberOfItemsFound} ) For Keyword {keyword}: Expecting {numberOfItemsExpected}  <i>The keyword should have had items on the keyword line but only number of data items were found</i>
<b>E0129</b>	MDL_ERR_29	( line {lineNum} ) - Model Name Over {maxModelNameChars} Characters Long  <i>[UNUSED]</i>
<b>E0130</b>	MDL_ERR_30	"( line {lineNum} ) - Invalid Model Name (\"{reservedWord}\"), Reserved Word."  <i>A reserved word was used as a model name</i>
<b>E0131</b>	MDL_ERR_31	"( line {lineNum} ) - Model Name Previously Defined (\"{modelName}\")"  <i>A new model is being defined with the same name as a previously defined model.</i>
<b>E0132</b>	MDL_ERR_32	( line {lineNum} ) - Redundant a_port for A2D~ \n  <i>[UNUSED]</i>
<b>E0133</b>	MDL_ERR_33	( line {lineNum} ) - Digital Port already used in previous A2D for this corner  <i>The digital port has already been used in a previous A2D section</i>

## IBISCHK6 User Guide

<b>E0134</b>	MDL_ERR_34	Unable to Parse {errorString}: {sourceFile} {sourceLinenum}
		<i>A generic error message which indicates that a parsing error related to</i>
<b>E0135</b>	MDL_ERR_35	( line {lineNum} ) - Duplicate External Language Line
		<i>The Language subparameter is already defined for an [External Model] section</i>
<b>E0136</b>	MDL_ERR_36	"( line {lineNum} ) - Invalid {subparam/keyword} (\\"{badValue}\") (try \\"{options}\")"
		<i>A generic error message which indicates that a wrong value was specified for a particular. The user must specify from one of the</i>
<b>E0137</b>	MDL_ERR_37	Incorrect Number of Line Items ({lineNum}) For {numberOfItemsFound}: Expecting {numberOfItemsExpected}
		<i>The sub parameter should have had items on the keyword line but only number of data items were found</i>
<b>E0138</b>	MDL_ERR_38	( line {lineNum} ) - Missing Language sub-parameter. Language must be defined
		<i>The Language subparameter was not defined in an [External Model] section</i>
<b>E0139</b>	MDL_ERR_39	( line {lineNum} ) - Duplicate Typ Corner
		<i>The Typ corner was specified multiple times in [External Model] Corner sub parameter</i>
<b>E0140</b>	MDL_ERR_40	( line {lineNum} ) - Duplicate Max Corner
		<i>The Max corner was specified multiple times in [External Model] Corner sub parameter</i>
<b>E0141</b>	MDL_ERR_41	( line {lineNum} ) - Duplicate Min Corner
		<i>The Min corner was specified multiple times in [External Model] Corner sub parameter</i>
<b>E0142</b>	MDL_ERR_42	( line {lineNum} ) - Wrong number of args in PORT_TYPE
		<i>Non spec check</i>
<b>E0143</b>	MDL_ERR_43	( line {lineNum} ) - Port_type not allowed
		<i>Non spec check</i>
<b>E0144</b>	MDL_ERR_44	( line {lineNum} ) - Language must be defined before D2A
		<i>The Language subparam should be specified before the D_to_A subparam</i>

<b>E0145</b>	MDL_ERR_45	( line {lineNum} ) - D2A only allowed for language = SPICE or language = IBIS-ISS  <i>The subparam D2A can only be specified if the Language suparam is SPICE</i>
<b>E0146</b>	MDL_ERR_46	( line {lineNum} ) - No Typ Corner Defined... required  <i>The Typ corner was not specified in [External Model] Corner sub parameter</i>
<b>W0147</b>	MDL_ERR_47	( line {lineNum} ) - No Min Corner Defined for D2A. using Typ  <i>[UNUSED]</i>
<b>W0148</b>	MDL_ERR_48	( line {lineNum} ) - No Max Corner Defined for D2A. Using Typ  <i>[UNUSED]</i>
<b>E0149</b>	MDL_ERR_49	"Invalid {lineNum} Value (\"{badValue}\")"  <i>An invalid Corner was specified in the [External Model] section</i>
<b>E0150</b>	MDL_ERR_50	( line {lineNum} ) - trise < 0~[{tRiseval}]  <i>The tRise specified on the D_to_A subparam is less than 0</i>
<b>E0151</b>	MDL_ERR_51	( line {lineNum} ) - tfall < 0~[{tFallval}]  <i>The tFall specified on the D_to_A subparam is less than 0</i>
<b>E0152</b>	MDL_ERR_52	( line {lineNum} ) - Vlow >= Vhigh [{lowValue} >= {highValue}]  <i>The Vlow is greater Vhigh for the D_to_A subparam in an [External Model] section</i>
<b>E0153</b>	MDL_ERR_53	( line {lineNum} ) - Illegal Analog Port {portName}~not in port list
<b>E0154</b>	MDL_ERR_54	( line {lineNum} ) - Language must be defined before A2D  <i>The Language subparam should be specified before the A_to_D subparam</i>
<b>E0155</b>	MDL_ERR_55	( line {lineNum} ) - NO Typ Corner defined for A2D
<b>W0156</b>	MDL_ERR_56	( line {lineNum} ) - NO Min Corner defined for A2D. Using Typ

[UNUSED]

<b>W0157</b>	MDL_ERR_57	( line {lineNum} ) - NO Max Corner defined for A2D. Using Typ
--------------	------------	---

[UNUSED]

<b>E0158</b>	MDL_ERR_58	"( line {lineNum} ) - Invalid {subparam} (\\"{value}\")"
--------------	------------	--

*A Generic error to display that the [Model] subparameter (Enable; IOType; Polarity) has an invalid value . Also used for [Add SubModel] Mode subparameter. This error message is also used incorrectly for invalid [External Model] subparameters.*

<b>W0159</b>	MDL_ERR_59	( line {lineNum} ) - Vinl should not be specified for model type {modelType}
--------------	------------	--

*is not an Input and IO modeltype and hence Vinl cannot be specified*

<b>W0160</b>	MDL_ERR_60	( line {lineNum} ) - {subType} should not be specified for model type {modelType}
--------------	------------	---

[UNUSED]

<b>W0161</b>	MDL_ERR_61	( line {lineNum} ) - Vinh should not be specified for model type {modelType}
--------------	------------	--

*is not an Input and IO modeltype and hence Vinl cannot be specified*

<b>E0162</b>	MDL_ERR_62	( line {lineNum} ) - Sub Parameter Cref_diff is valid only for IBIS version >= 4.1
--------------	------------	--

*Cref\_diff is not valid for IBIS file versions less than 4.1*

<b>W0163</b>	MDL_ERR_63	( line {lineNum} ) - Creff_diff should not be specified for model type {modelType}
--------------	------------	--

*is not an output model type hence Cref\_diff is not valid*

<b>E0164</b>	MDL_ERR_64	( line {lineNum} ) - Sub Parameter Rref_diff is valid only for IBIS version >= 4.1
--------------	------------	--

*Rref\_diff is not valid for IBIS file versions less than 4.1*

<b>W0165</b>	MDL_ERR_65	( line {lineNum} ) - Rreff_diff should not be specified for model type {modelType}
--------------	------------	--

*is not an output model type hence Rref\_diff is not valid*

<b>W0166</b>	MDL_ERR_66	( line {lineNum} ) - Vmeas should not be specified for model type {modelType}
--------------	------------	---

*is one of Input; Input\_Diff; Input\_Ecl; Terminator; Series; Series\_switch hence Vmes is not valid*

<b>W0167</b>	MDL_ERR_67	( line {lineNum} ) - Cref should not be specified for model type {modelType}
--------------	------------	--

*is one of Input; Input\_Diff; Input\_Ecl; Terminator; Series; Series\_switch hence Cref is not valid*

<b>W0168</b>	MDL_ERR_68	( line {lineNum} ) - Rref should not be specified for model type {modelType}
--------------	------------	--

*is one of Input; Input\_Diff; Input\_Ecl; Terminator; Series; Series\_switch hence Rref is not valid*

<b>W0169</b>	MDL_ERR_69	( line {lineNum} ) - Vref should not be specified for model type {modelType}
--------------	------------	--

*is one of Input; Input\_Diff; Input\_Ecl; Terminator; Series; Series\_switch hence Vref is not valid*

<b>E0170</b>	MDL_ERR_70	( line {lineNum} ) - Sub Parameter C_comp_pullup is valid only for IBIS version >= 4.0
--------------	------------	--

*C\_comp\_pullup is not valid for IBIS file versions less than 4.0*

<b>E0171</b>	MDL_ERR_71	( line {lineNum} ) - Sub Parameter C_comp_pulldown is valid only for IBIS version >= 4.0
--------------	------------	--

*C\_comp\_pulldown is not valid for IBIS file versions less than 4.1*

<b>E0172</b>	MDL_ERR_72	( line {lineNum} ) - Sub Parameter C_comp_power_clamp is valid only for IBIS version >= 4.0
--------------	------------	---

*C\_comp\_power\_clamp is not valid for IBIS file versions less than 4.2*

<b>E0173</b>	MDL_ERR_73	( line {lineNum} ) - Sub Parameter C_comp_gnd_clamp is valid only for IBIS version >= 4.0
--------------	------------	---

*C\_comp\_gnd\_clamp is not valid for IBIS file versions less than 4.2*

<b>E0174</b>	MDL_ERR_74	( line {lineNum} ) - Unknown Line Among Model Data
--------------	------------	--

*A line was found in the [Model] section which was not a valid line*

<b>E0175</b>	MDL_ERR_75	( line {lineNum} ) - '{subparam}' Subparameter Missing Setting
--------------	------------	--

*There was no value specified for model subparameter*

<b>E0176</b>	MDL_ERR_76	( line {lineNum} ) - Invalid {subparam} Line
--------------	------------	--

*The line corresponding to model subparameter has an invalid syntax*

<b>W0177</b>	MDL_ERR_77	( line {lineNum} ) - Model {model}: {subparam} min value is not the smallest value listed
--------------	------------	---

*Unused*

<b>E0178</b>	MDL_ERR_78	( line {lineNum} ) - 'NA' Not Allowed For Typical Value
--------------	------------	---

*Unused*

<b>W0179</b>	MDL_ERR_79	Model {modelName}: {subparam} max value is not the largest value listed  <i>Unused</i>
<b>E0180</b>	MDL_ERR_80	Model '{modelName}': {Model_type} Not Defined  <i>The Model Type is not defined for Model</i>
<b>E0181</b>	MDL_ERR_81	Model {modelName}: One of C_comp~C_comp_pullup~C_comp_pulldown~C_comp_power_clamp~C_comp_gnd_clamp must be defined  <i>A mandatory sub-parameter is missing for</i>
<b>C0182</b>	MDL_ERR_82	Vmeas is <= Vinl for model {modelName}  <i>Vmeas must be greater than Vinl but is not so for</i>
<b>C0183</b>	MDL_ERR_83	Vmeas is >= Vinh for model {modelName}  <i>Vmeas must be less than Vinh but is not so for</i>
<b>W0184</b>	MDL_ERR_84	Model '{modelName}': Model_type '{modelType}' must have {subparam} set  <i>A generic message indicating that for Model which is of type the Vinl or Vinh parameter should be set</i>
<b>E0185</b>	MDL_ERR_85	Model '{modelName}': {subparam} is set when Model_type is not Terminator  <i>Model is not Terminator type; but corresponding to Rgnd; Rpower; Rac; or Cac has been defined</i>
<b>E0186</b>	MDL_ERR_86	Model '{modelName}': Rac must be defined when Cac is  <i>For Model which is of type Terminator; Cac is defined but Rac is not</i>
<b>E0187</b>	MDL_ERR_87	Model '{modelName}': Cac must be defined when Rac is  <i>For Model which is of type Terminator; Rac is defined but Cac is not</i>

<b>E0603</b>	PIN_ERR_3	( line {lineNum} ) - Model name not found.  <i>The model_name was not specified in a data line in the [Pin] section</i>
<b>E0604</b>	PIN_ERR_4	( line {lineNum} ) - Each line of Pin data must contain either 3 or 6 columns.  <i>A data line in the [Pin] section should have either 3 (if the package parameters are not specified) or 6 (if the package parameters are specified) values</i>
<b>E0605</b>	PIN_ERR_5	( line {lineNum} ) - When using 6 columns~ the headers R_pin~L_pin~and C_pin must be listed.  <i>If package parameters are specified for a pin in the [Pin] section; then the headers R_pin; L_pin and C_pin must be specified on the [Pin] keyword line</i>
<b>E0606</b>	PIN_ERR_6	( line {lineNum} ) - Duplicate Pin '{pinName}'.  <i>The same was defined more than once in the [Pin] section</i>
<b>B0607</b>	PIN_ERR_7	{sourceFile}:{sourceLinenum}:Unable to get IBIS?  <i>Program data structures are corrupt in program file</i>
<b>E0608</b>	PIN_ERR_8	Component '{compName}': Model '{modelName}' for Pin '{pinName}' not defined.  <i>The model associated with pin for component was not defined elsewhere in the file</i>
<b>C0609</b>	PIN_ERR_9	Pin {pinName} is not defined as a Diff Pin though the associated Model Selector {modelSelectorName} was determined to be Differential  <i>The pin is associated with a model selector which was found to be associated with a differential model but the pin is not defined as a differential pin</i>
<b>E0610</b>	PIN_ERR_10	Component '{compName}': Pin '{pinName}': Model '{modelName}': model type for a Pin cannot be Series or Series_switch.  <i>[UNUSED]</i>
<b>C0611</b>	PIN_ERR_11	Pin {pinName} is not defined as a Diff Pin though the associated Model {modelName} was

		determined to be Differential
		<i>The pin is associated with a model which was found to be differential but the pin is not defined as a differential pin</i>
<b>E0612</b>	PIN_ERR_12	Component '{compName}': Pin '{pinName}' not referenced in Pin Mappings.
		<i>The Pin of Component is not referenced in the component's [Pin Mapping] section</i>
<b>E0613</b>	PIN_ERR_13	Pin '{pinName}' found in Package_Model '{pkgName}' Pin_Numbers list not found in Component '{compName}' Pin list.
		<i>The Pin was referenced in the [Pin Numbers] section of the package model but is not defined in the [Pin] section of the associated component</i>
<b>E0614</b>	PIN_ERR_14	( line {lineNum} ) - Unable to allocate new PIN.
		<i>Memory allocation for a new pin failed while trying to parse the [Pin] section</i>
<b>E0700</b>	PINMPG_ERR_0	( line {lineNum} ) - Extra data columns on this line.
		<i>There was some extraneous data specified at the end of the data line in the [Pin Mapping] section</i>
<b>E0701</b>	PINMPG_ERR_1	( line {lineNum} ) - No Pin number.
		<i>A pin number was not specified on a data line in the [Pin Mapping] section</i>
<b>E0702</b>	PINMPG_ERR_2	( line {lineNum} ) - No pulldown_ref data.
		<i>The pulldown reference was not specified on a data line in the [Pin Mapping] section</i>
<b>E0703</b>	PINMPG_ERR_3	( line {lineNum} ) - No pullup_ref data.
		<i>The pullup reference was not specified on a data line in the [Pin Mapping] section</i>
<b>E0704</b>	PINMPG_ERR_4	( line {lineNum} ) - Pin Mapping data lines must contain either 3~5 or 6 columns.
		<i>A data line in the [Pin Mapping] section should contain 3 entries (when the pin number; pullup reference and pulldown reference are specified) or 5 entries (when the external reference is not specified) and 6 entries when the pin number; pulldown reference; pullup reference; gnd clamp reference; power clamp reference and external reference are all specified)</i>
<b>E0705</b>	PINMPG_ERR_5	( line {lineNum} ) - Pin Mapping data lines must contain either 3 or 5 columns.
		<i>In IBIS versions earlier than 4.1; a data line in the [Pin Mapping] section should contain 3 entries (when the pin number; pullup reference and pulldown reference are only specified) or 5 entries (when the pin number; pullup reference; pulldown reference; power clamp</i>

*reference and gnd clamp reference are specified)*

<b>E0706</b>	PINMPG_ERR_6	( line {lineNum} ) - When 5 columns are specified~the headings gnd_clamp_ref and power_clamp_ref must be used.
		<i>The column headings gnd_clamp_ref and power_clamp_ref must be specified on the [Pin Mapping] keyword line when a data line contains 5 entries</i>
<b>E0707</b>	PINMPG_ERR_7	( line {lineNum} ) - When 6 columns are specified~the headings gnd_clamp_ref~power_clamp_ref and ext_ref must be used.
		<i>The column headings gnd_clamp_ref and power_clamp_ref and ext_ref must be specified on the [Pin Mapping] keyword line when a data line contains 6 entries</i>
<b>E0708</b>	PINMPG_ERR_8	( line {lineNum} ) - Duplicate Pin Mapping Pin.
		<i>A pin must be referenced at most once within a [Pin Mapping] section</i>
<b>W0709</b>	PINMPG_ERR_9	( line {lineNum} ) - Component {compName} Pin {pinName} is a POWER pin. Usually only has Pullup_ref in Pin Mapping
		<i>Pin of Component has a model type of POWER and hence should only have a Pullup_ref associated with it in the [Pin Mapping] section</i>
<b>W0710</b>	PINMPG_ERR_10	( line {lineNum} ) - Pin {pinName} is a POWER pin. Usually only has Pullup_ref in Pin Mapping
		<i>Pin has a model type of POWER and hence should only have a Pullup_ref associated with it in the [Pin Mapping] section</i>
<b>W0711</b>	PINMPG_ERR_11	( line {lineNum} ) - Component {compName} Pin {pinName} is a GND pin. Usually only has Pulldown_ref in Pin Mapping
		<i>Pin of Component has a model type of GND and hence should only have a Pulldown_ref associated with it in the [Pin Mapping] section</i>
<b>W0712</b>	PINMPG_ERR_12	( line {lineNum} ) - Pin {pinName} is a GND pin. Usually only has Pulldown_ref in Pin Mapping
		<i>Pin has a model type of GND and hence should only have a Pulldown_ref associated with it in the [Pin Mapping] section</i>
<b>W0713</b>	PINMPG_ERR_13	( line {lineNum} ) - Component {compName} Pin {pinName} is NC. Should not have any references in Pin Mapping
		<i>The pin in Component is of model type NC and hence should not be associated with any references in the [Pin Mapping] section</i>
<b>W0714</b>	PINMPG_ERR_14	( line {lineNum} ) - Pin {pinName} is NC. Should not have any references in Pin Mapping

*The pin is of model type NC and hence should not be associated with any references in the [Pin Mapping] section*

<b>E0715</b>	PINMPG_ERR_15	Component '{compName}': Pin Mapping Pin '{pinName}' not previously declared in Pin section.
		<i>The pin has been referenced in the [Pin Mapping] section of component but the pin has no definition in the [Pin] section of the component</i>
<b>E0716</b>	PINMPG_ERR_16	Component '{compName}': Pin Mapping pulldown_ref entry '{pdRef}' is not connected to at least one pin whose model_name is POWER or GND.
		<i>In component ; the pull down reference in the [Pin Mapping] section is not associated with a pin whose model is POWER or GND</i>
<b>W0717</b>	PINMPG_ERR_17	Component '{compName}': Pin Mapping '{pdRef}': pulldown_ref entry is usually connected to GND.
		<i>In component ; the pull down reference in the [Pin Mapping] section is associated with a pin whose model is POWER; but the expectation is that it would be associated with a pin whose model is GND</i>
<b>W0718</b>	PINMPG_ERR_18	Component {compName}: Pulldown Reference {pdRef} is also used as a Pullup Reference
		<i>In component ; in the [Pin Mapping] section; the pulldown reference is also used as a pullup reference. This message is only generated for IBIS versions &gt;= 4.</i>
<b>W0719</b>	PINMPG_ERR_19	Pulldown Reference {pdRef} is also used as a Pullup Reference
		<i>In the [Pin Mapping] section; the pulldown reference is also used as a pullup reference. This message is only generated for IBIS versions &lt; 4.</i>
<b>E0720</b>	PINMPG_ERR_20	Component '{compName}': Pin Mapping pullup_ref entry '{puRef}' is not connected to at least one pin whose model_name is POWER or GND.
		<i>In component ; the pull up reference in the [Pin Mapping] section is not associated with a pin whose model is POWER or GND</i>
<b>W0721</b>	PINMPG_ERR_21	Component '{compName}': Pin Mapping '{puRef}': pullup_ref entry is usually connected to POWER.
		<i>In component ; the pull up reference in the [Pin Mapping] section is associated with a pin whose model is GND; but the expectation is that it would be associated with a pin whose model is POWER</i>
<b>E0722</b>	PINMPG_ERR_22	Component '{compName}': Pin Mapping gnd_clamp_ref entry '{gcRef}' is not connected to at least one pin whose model_name is POWER or GND.
		<i>In component ; the gnd clamp reference in the [Pin Mapping] section is not associated with a pin whose model is POWER or GND</i>

<b>W0723</b>	PINMPG_ERR_23	Component '{compName}': Pin Mapping '{gcRef}': gnd_clamp_ref entry is usually connected to GND.  <i>In component ; the gnd clamp reference in the [Pin Mapping] section is associated with a pin whose model is POWER; but the expectation is that it would be associated with a pin whose model is GND</i>
<b>E0724</b>	PINMPG_ERR_24	Component '{compName}': Pin Mapping power_clamp_ref entry '{pcRef}' is not connected to at least one pin whose model_name is POWER or GND.  <i>In component ; the power clamp reference in the [Pin Mapping] section is not associated with a pin whose model is POWER or GND</i>
<b>W0725</b>	PINMPG_ERR_25	Component '{compName}': Pin Mapping '{pcRef}': power_clamp_ref entry is usually connected to POWER.  <i>In component ; the power clamp reference in the [Pin Mapping] section is associated with a pin whose model is GND but the expectation is that it would be associated with a pin whose model is POWER</i>
<b>E0726</b>	PINMPG_ERR_26	Component '{compName}': Pin Mapping ext_ref entry '{extRefName}' is not connected to at least one pin whose model_name is POWER or GND.  <i>In component ; the external reference in the [Pin Mapping] section is not associated with a pin whose model is POWER or GND</i>
<b>W0727</b>	PINMPG_ERR_27	Component '{compName}': Pin Mapping '{extRefName}': ext_ref entry is usually connected to POWER.  <i>In component ; the external reference in the [Pin Mapping] section is associated with a pin whose model is GND but the expectation is that it would be associated with a pin whose model is POWER</i>
<b>E0728</b>	PINMPG_ERR_28	( line {lineNum} ) - Unable to alloc new PINMPG.  <i>Memory allocation failed when trying to create the data structures for a [Pin Mapping]</i>
<b>E0729</b>	PINMPG_ERR_29	( line {lineNum} ) - {badValue} is an invalid Pin_Mapping column entry.  <i>"A ""NA"" has been specified on a row in the [Pin Mapping] section"</i>
<b>E0800</b>	DIFPIN_ERR_0	( line {lineNum} ) - Unable to alloc DIFPIN.  <i>Memory allocation failed when trying to create the data structures for a [Diff Pin]</i>
<b>E0801</b>	DIFPIN_ERR_1	( line {lineNum} ) - Too many Diff Pin data columns.  <i>There are too many tokens on a data line in the [Diff Pin] section</i>

<b>E0802</b>	DIFPIN_ERR_2	( line {lineNum} ) - No Diff_Pin column entry.  <i>Diff_pin was not specified on a data line in the [Diff Pin] section</i>
<b>E0803</b>	DIFPIN_ERR_3	( line {lineNum} ) - No inv_pin column entry.  <i>inv_pin was not specified on a data line in the [Diff Pin] section</i>
<b>E0804</b>	DIFPIN_ERR_4	( line {lineNum} ) - Diff_Pin column pin same as inv_pin column pin.  <i>The diff pin and the inv pin on a data line in the [Diff Pin] section should not be the same</i>
<b>E0805</b>	DIFPIN_ERR_5	( line {lineNum} ) - No vdiff column entry.  <i>Vdiff was not specified on a data line in the [Diff Pin] section</i>
<b>E0806</b>	DIFPIN_ERR_6	( line {lineNum} ) - No tdelay_typ column entry.  <i>tdelay_typ was not specified on a data line in the [Diff Pin] section</i>
<b>W0807</b>	DIFPIN_ERR_7	( line {lineNum} ) - Typ value is not in between Min and Max  <i>The tdelay_typ value does not lie between the min and max values in a [Diff Pin] section</i>
<b>E0808</b>	DIFPIN_ERR_8	( line {lineNum} ) - Diff_Pin data line column count must be 4 or 6.  <i>A data line in the [Diff Pin] section should contain 6 colums; ie; Diff_pin; inv_pin; vdiff; tdelay_typ; tdelay_min; tdelay_max or 4 columns; ie; Diff_pin; inv_pin; vdiff; tdelay_typ</i>
<b>E0809</b>	DIFPIN_ERR_9	( line {lineNum} ) - When using 6 columns~the tdelay_min and tdelay_max headers must be used.  <i>A data line in the [Diff Pin] section contains 6 values but only 4 headers were specified on the keyword line</i>
<b>E0810</b>	DIFPIN_ERR_10	Component '{compName}': Diff_Pin '{pinName}' not previously declared in Pin section.  <i>The pin was referred to in the [Diff Pin] section of component but not defined in the [Pin] section of the component</i>
<b>E0811</b>	DIFPIN_ERR_11	Component '{compName}': inv_pin '{pinName}' not previously declared in Pin section.  <i>The pin was referred to in the [Inv Pin] section of component but not defined in the [Pin] section of the component</i>
<b>W0812</b>	DIFPIN_ERR_12	Component '{compName}': Diff_Pin '{pinName}' is not unique.

*The Diff\_pin has been referenced more than once in the [Diff Pin] section of component*

<b>E0813</b>	DIFPIN_ERR_13	Component '{compName}': Inv_pin '{pinName}' already in use as a Diff_pin.
--------------	---------------	---

*The inv\_pin has been referenced as a Diff\_pin in the [Diff Pin] section of component*

<b>E0814</b>	DIFPIN_ERR_14	Component '{compName}': Diff_pin '{pinName}' already in use as an inv_pin.
--------------	---------------	--

*The Diff\_pin has been referenced as an inv\_pin in the [Diff Pin] section of component*

<b>W0815</b>	DIFPIN_ERR_15	Component '{compName}': inv_pin '{pinName}' is not unique.
--------------	---------------	--

*The inv\_pin has been referenced more than once in the [Diff Pin] section of component*

### 4.3 MESSAGE CODES 1000 TO 1499

<b>Code</b>	<b>Symbol</b>	<b>Message/Comments</b>
<b>B1000</b>	HDR_ERR_0	Unable to get ptr to IBIS struct?
		<i>Internal data structures were found to be corrupt</i>
<b>E1001</b>	HDR_ERR_1	( line {lineNum} ) - Orphan File Header keyword.

*A header keyword [IBIS Ver]; [File Name]; [File Rev]; [Date]; [Source]; [Notes]; [Disclaimer]; [Copyright] was specified where it was not expected*

<b>E1002</b>	HDR_ERR_2	( line {lineNum} ) - Orphan Data Line.
		<i>A line was identified as a data line for a header keyword but the header definition is not in progress</i>
<b>B1003</b>	HDR_ERR_3	( line {lineNum} ) - Bad keyword type passed to hdr.
		<i>The code has a bug while parsing the header keywords</i>
<b>B1004</b>	HDR_ERR_4	( line {lineNum} ) - Bad line type passed to hdr.
		<i>The code has a bug while parsing the header keywords</i>
<b>E1005</b>	HDR_ERR_5	( line {lineNum} ) - Duplicate IBIS_Ver keyword
		<i>The [IBIS_Ver] keyword was found more than once in the input file</i>
<b>E1006</b>	HDR_ERR_6	Unable to create new File Header structure.
		<i>The code failed to allocate the required memory</i>
<b>E1007</b>	HDR_ERR_7	( line {lineNum} ) - IBIS_Version must be first keyword.\n
		<i>The first keyword in an IBIS file should be [IBIS Ver]</i>
<b>E1008</b>	HDR_ERR_8	( line {lineNum} ) - Illegal IBIS_Version '{badVersion}'.
		<i>An invalid version was specified as the IBIS version</i>
<b>E1009</b>	HDR_ERR_9	( line {lineNum} ) - Duplicate File_name keyword.
		<i>The [File Name] keyword was found more than once in the input file</i>
<b>E1010</b>	HDR_ERR_10	File_name '{fileName}' contains an upper case character '{character}'.
		<i>Input file name should only used lower case characters but an upper case character was found</i>
<b>E1011</b>	HDR_ERR_11	File_name '{fileName}' contains a character '{character}' that is illegal for DOS.
		<i>Input file name contains a character that is not allowed in DOS/Windows</i>
<b>E1012</b>	HDR_ERR_12	File_name '{fileName}' contains more than one period.

*Input file name contains more than one period '.' character*

<b>E1013</b>	HDR_ERR_13	File_name '{fileName}' must contain one period.
--------------	------------	---

*Input file name contains no period '.' characters*

<b>E1014</b>	HDR_ERR_14	( line {lineNum} ) - File name opened '{actualFileName}' not the same as File_name '{keywordFileName}'.
--------------	------------	---

*The file name that was providing on the command line to the parser; is not the same as the file name specified with the [File Name] keyword*

<b>E1015</b>	HDR_ERR_15	( line {lineNum} ) - Duplicate File_Rev keyword.
--------------	------------	--

*The [File Rev] keyword was found more than once in the input file*

<b>E1016</b>	HDR_ERR_16	( line {lineNum} ) - Duplicate Date keyword.
--------------	------------	--

*The [Date] keyword was found more than once in the input file*

<b>E1017</b>	HDR_ERR_17	( line {lineNum} ) - Duplicate Source keyword.
--------------	------------	--

*The [Source] keyword was found more than once in the input file*

<b>E1018</b>	HDR_ERR_18	( line {lineNum} ) - Duplicate Notes keyword.
--------------	------------	---

*The [Notes] keyword was found more than once in the input file*

<b>E1019</b>	HDR_ERR_19	( line {lineNum} ) - Duplicate Copyright keyword.
--------------	------------	---

*The [Copyright] keyword was found more than once in the input file*

<b>E1020</b>	HDR_ERR_20	( line {lineNum} ) - Unable to add text.
--------------	------------	--

*The code failed to allocate the required memory*

<b>E1100</b>	CRV_ERR_0	( line {lineNum} ) - {curveName} Already Defined
--------------	-----------	--

*The curve has already been defined*

<b>B1101</b>	CRV_ERR_1	Unable to Allocate Memory: {sourceFile} {sourceLinenum}
--------------	-----------	---

*The code failed to allocate memory*

<b>B1102</b>	CRV_ERR_2	Should Not Be Here: {sourceFile}~{sourceLinenum}
--------------	-----------	--

*The code has a bug*

<b>B1103</b>	CRV_ERR_3	Unable to Parse {text}: {sourceFile} {sourceLinenum}
--------------	-----------	--

*A generic error message which indicates that a parsing error related to*

<b>E1104</b>	CRV_ERR_4	( line {lineNum} ) - Incorrect Number of Line Items ( {numberOfItemsFound} ) For {paramName}: Expecting {numberOfItemsExpected}
--------------	-----------	---

*The sub parameter should have had items on the keyword line but only number of data items were found*

<b>B1105</b>	CRV_ERR_5	Out of Memory
--------------	-----------	---------------

*The code failed to allocate the required memory*

<b>E1106</b>	CRV_ERR_6	( line {lineNum} ) - Voltage Value Cannot Be 'NA'
--------------	-----------	---

*The Voltage value has to be specified as a numeric value in a data line for a curve*

<b>E1107</b>	CRV_ERR_7	( line {lineNum} ) - More Than {maxPoints} Voltage Points Provided For {curveName}
--------------	-----------	--

*More than data points (ie; 100) were sepcified for curve*

<b>E1108</b>	CRV_ERR_8	Require at least 2 Voltage Points for {lineNum} Beginning at Line {curveName}
--------------	-----------	---

*The curve defined on line has less than 2 data points*

<b>E1109</b>	CRV_ERR_9	{First Last} {Typ Min Max} Value Cannot Be 'NA' for {curveName} Beginning at Line {lineNum}
--------------	-----------	---

*A general message indicating that the (the first or the last) (typValue; min or max) value for the curve defined on line cannot be NA*

<b>N1110</b>	CRV_ERR_10	( line {lineNum} ) - {curveName} {Typ Min Max} data is non-monotonic
--------------	------------	--

*The is non monotonic*

<b>W1111</b>	CRV_ERR_11	{label} {name}: {curveName} has Decreasing Current
--------------	------------	--

*A general message indicating that the section with name has a curve which has decreasing current*

<b>W1112</b>	CRV_ERR_12	{label} {name}: {curveName} has Increasing Current
--------------	------------	--

*A general message indicating that the section with name has a curve which has increasing current*

## IBISCHK6 User Guide

<b>W1113</b>	CRV_ERR_13	{label} {name}: {curveName} : Typical value never becomes zero
		<i>A general message indicating that the section with name has a curve whose typical current never becomes zero</i>
<b>W1114</b>	CRV_ERR_14	{label} {name}: {curveName} : Minimum value never becomes zero
		<i>A general message indicating that the section with name has a curve whose minimum current never becomes zero</i>
<b>W1115</b>	CRV_ERR_15	{label} {name}: {curveName} : Maximum value never becomes zero
		<i>A general message indicating that the section with name has a curve whose maximum current never becomes zero</i>
<b>E1200</b>	PKG_ERR_0	( line {lineNum} ) - Unable to allocate a Package
		<i>Memory allocation for a Package while parsing the [Package] section</i>
<b>E1201</b>	PKG_ERR_1	( line {lineNum} ) - Package sub-parameters must start in column 1.
		<i>The package sub parameters R_pkg; L_pkg; C_pkg should be defined starting at column 1</i>
<b>E1202</b>	PKG_ERR_2	( line {lineNum} ) - Expected {expected} columns in Package sub-parameter line~found {actualColumns} columns.
		<i>Each data line in a [Package] section should have (ie; 4) number of values but number were specified</i>
<b>E1203</b>	PKG_ERR_3	( line {lineNum} ) - Duplicate R_pkg sub-parameter.
		<i>The R_pkg subparameter was multiply defined</i>
<b>E1204</b>	PKG_ERR_4	( line {lineNum} ) - Duplicate L_pkg sub-parameter.
		<i>The L_pkg subparameter was multiply defined</i>
<b>E1205</b>	PKG_ERR_5	( line {lineNum} ) - Duplicate C_pkg sub-parameter.
		<i>The C_pkg subparameter was multiply defined</i>
