Welcome From JEITA / EC Center EDA Model Specialty Committee

- Thank you for joining us at the Asian IBIS Summit (TOKYO) again this year.
- We are very happy to have supported the holding of the Summit by the IBIS Open Forum in Japan for 16 years.
- Same as last year, this year's summit will be held online to prevent the spread of coronavirus infections. We look forward to holding next year's summit by face-to-face rather than online.
- We would like to thank the IBIS Open Forum officers, speakers, and JEITA / EC Center staff for their great cooperation in preparing for this summit.

Satoshi Nakamizo

Keysight Technologies Japan K.K.

Chair, EDA Model Specialty Committee

EC Center / JEITA

About EDA Model Specialty Committee

- Since the establishment of the EDA Standard WG in 2004, and then the IBIS Promoting WG, we are today the EDA Model Specialty Committee.
- We work under the JEITA/EC Center for the purpose of improving utilization technologies for the EDA Model, including the IBIS Model, and promoting their distribution.

Current status of the EDA models and our objective

- The EDA models and their specifications will be continually revised with the advent of new technologies and will also become more and more complex.
- Considering this situation, we will work to continue broadly providing information to all users of the EDA Model. We will introduce our new website and YouTube channel on the following pages.
- We are putting out a broad invitation to anyone who is interested in working together with us on committee activities of the EDA Model Specialty Committee. If you are interested in joining the committee, please contact us. We hope to hear from you.

Please visit our new website and YouTube channel

- We have launched our new website in order to provide the latest information in EDA models centered on IBIS. It also contains a message from Randy-san, the chair of the IBIS Open Forum, and technical information.
- We will frequently update our website. Stay tuned!

Technical
Information

Please visit our new website and YouTube channel

- We held the 9th JEITA/IBIS Seminar online in September of this year. More than 150 people participated and lively discussions took place in the Q&A.
- Each session of the IBIS seminar can be viewed on demand through YouTube. These are published on our YouTube channel, which was opened due to many requests.

About 2021 Virtual Asian IBIS Summit (TOKYO)

- The Summit offers a platform to present information on new IBIS specifications. It is also a platform to discuss and exchange views with the IBIS Open Forum.
- We hope everyone here today will make the most of this opportunity.
